

Potential Changes to FHA Single-Family Loan Limits beginning October 1, 2011 from Implementation of the Housing and Economic Recovery Act of 2008

A Market Analysis Brief

U.S. Department of Housing and Urban Development
Office of Housing / Risk Management and Regulatory Affairs / Evaluation

May 26, 2011

I. Introduction

Barring Congressional action, Federal Housing Administration (FHA) loan limits will revert back to loan limits determined under the Housing and Economic Recovery Act (HERA) for loans insured by FHA on or after October 1, 2011. As a result, FHA loan limits would likely decline in 669 of the 3,334 counties or county equivalents that are eligible for FHA insurance. A complete list of FHA loan limits for the 669 potentially affected counties and county equivalents is provided in Table 1 of this Market Analysis Brief. The remaining 2,665 counties are unlikely to experience a change in loan limits. This Market Analysis Brief discusses the location and impact of the potential loan limit declines as initial guidance to the industry and consumers. Additional information and analysis may be shared in the coming months.

FHA loan limits restrict the size of mortgages that can be insured by the Federal Housing Administration (FHA). Prior to 2008, the National Housing Act, as amended in 1998 Mortgage Letter 1998-28, required that FHA mortgage limits be set at 95 percent of the median house price in that area. However, FHA loan limits could not exceed 87 percent or go lower than 48 percent of the conforming mortgage limit established by the Government Sponsored Enterprises (GSE) in any given area. For the high-cost states and territories (Alaska, Guam, Hawaii, and the Virgin Islands), the National Housing Act allowed mortgage limits to be 150 percent of the national ceiling.

To mitigate the effects from the economic downturn and the sharp reduction of mortgage credit availability from private sources, Congress temporarily increased FHA loan limits in 2008. The Economic Stimulus Act (ESA) enacted in February 2008 stipulated that FHA loan limits be set temporarily at 125 percent of the median house price in each area.¹ The FHA loan limits could not exceed 175 percent of the 2008 GSE conforming mortgage limit of \$417,000; nor be lower than 65 percent of the same 2008 GSE conforming loan limit for a residence of applicable size for any given area. Also, ESA stipulated that mortgage limits for Alaska, Guam, Hawaii, and the Virgin Islands be adjusted up to 150 percent of the national ceiling.

¹ ESA loan limits apply to all FHA mortgages endorsed beginning March 1, 2008 under the following sections of the National Housing Act: Section 203(b) FHA's basic 1-4 family mortgage insurance program, Section 203(h) Mortgages for disaster victims, Section 203(k) Rehabilitation mortgage insurance, Section 203(c) Condominium units, and Section 203(e) Property in declining areas. ESA does not affect mortgage limits on Home Equity Conversion Mortgages (HECM) Section 255.

Five months after passing ESA, Congress enacted the Housing and Economic Recovery Act (HERA) in July 2008, which established the Federal Housing Finance Administration (FHFA) and assigned FHFA the responsibility to establish conforming mortgage limits for the nation and for high-cost areas.² Since 2009, the national conforming mortgage limit has been set at \$417,000. Mortgage limits under HERA are set at 115 percent of the county with the highest median house price within that MSA but cannot exceed 150 percent nor be lower than 65 percent of the GSE conforming mortgage limit. Similar to previous regimes, Section 214 of the National Housing Act applies in HERA. This section allows mortgage limits for Alaska, Guam, Hawaii and the Virgin Islands to be 150 percent higher than the ceiling.³ Finally, it should be noted that, when setting 2011 and prior year HERA limits, FHA has followed a policy of not allowing declines relative to prior HERA limits. This rule, which is consistent with the Act's policy of not allowing declines in the baseline loan limit, means that 2011 HERA limits are sometimes based on the median price level of an earlier year. Because the first cohort of HERA limits was determined using 2008 median prices, the 2011 HERA limits in all cases are based on median prices that are more recent than the 2007 median prices used in setting the 2008 ESA limits.

Seven months after passing HERA, Congress enacted the American Recovery and Reinvestment Act (ARRA) in February 2009. ARRA stipulated that FHA loan limits for 2009 be set in each area at the higher dollar amount when comparing loan limits established under 2008 ESA requirements and limits calculated for 2009 under HERA.⁴ These loan limits have since been extended by Congress each year, most recently through the Continuing Appropriations Act of 2011, and are the limits that are currently in effect for FHA loans. Barring Congressional action, FHA loan limits will revert back to loan limits determined under HERA for loans insured by FHA on or after October 1, 2011.

² HERA loan limits apply to all FHA mortgages endorsed after January 1, 2009 under the following sections of the National Housing Act: Section 203(b) FHA's basic 1-4 family mortgage insurance program, Section 203(h) Mortgages for disaster victims, Section 203(k) Rehabilitation mortgage insurance, and Section 203(c) Condominium units.

³ HERA also stipulates that Home Equity Conversion Mortgages (HECM) insured on or after November 6, 2008 will face a national mortgage dollar amount limit equal to the national conforming limit. In 2008, the national conforming mortgage limit was \$417,000. For high-cost areas the mortgage limits for HECMs were allowed to increase up to 115 percent or \$625,500 whichever is less.

⁴ ARRA loan limits apply to all FHA mortgages endorsed after January 1, 2010 under the following sections of the National Housing Act: Section 203(b) FHA's basic 1-4 family mortgage insurance program, Section 203(h) Mortgages for disaster victims, Section 203(k) Rehabilitation mortgage insurance, and Section 203(c) Condominium units.

II. Market Impact of Potential Loan Limit Declines

To determine the number of borrowers and loans that may be affected by the implementation of HERA loan limits, FHA evaluated the number of loans in calendar year 2010 (Table 2) and calendar year 2011 to date (Table 3) that had a principal balance at time of endorsement that is greater than the corresponding HERA limit for that jurisdiction.

For the U.S. as a whole, approximately 3% of loans by count (33,301) and 6% by dollar volume (\$14.2 billion) endorsed in calendar year 2010 would not have been endorsed had HERA limits been in effect. In calendar year 2011 to date (January through April), approximately 2% of endorsed loans by count (6,673) and 7% by dollar volume (\$2.8 billion) would have been affected.

It is important to note that streamline refinance loans would not be affected by any reduction in area loan limits. Loans insured prior to October 1, under higher loan limits, would still be eligible for streamline refinancing in the future, even if their outstanding balances remain above the loan limits in effect at that time. Thus, the analysis in Tables 2 and 3 does not include streamline refinance loans.

Additionally, loan limits for the FHA reverse mortgage program, the Home Equity Conversion Mortgage (HECM), are established under separate legal authority from loan limits for the forward loan program. Loan limits beginning on October 1, 2011 for HECM loans are currently under review and additional guidance will be provided in a subsequent communication to borrowers and the industry. As such, the analysis in Tables 2 and 3 does not include HECM loans.

III. Geographic Location and Impact of Potential Loan Limit Declines

Exhibit 1 maps the location of the counties in the continental U.S. that may be affected by the implementation of HERA loan limits and shows the approximate magnitude of the potential decline in the corresponding FHA loan limit. Table 1 shows by county the declines in FHA loan limits that could occur for one-unit properties.⁵

The magnitude of the decline in an area's loan limits does not directly correlate to the number of borrowers who might be affected. For example, 44 municipios in Puerto Rico may experience a \$221,000 decline in loan limits, the largest decrease of any county or county equivalent. This corresponds to a potential impact of 4% by loan count and 10% by dollar volume of FHA loans endorsed in calendar year 2010 in Puerto Rico. Loans originated in Puerto Rico represented less than one percent of all FHA loans endorsed in calendar year 2010 by both loan count and dollar volume.

⁵ Separate loan limits are set for two-, three-, and four-unit properties. Those limits would also decline in the identified areas. Through ESA, FHA loan limits for multiple unit properties are set at a multiple of the 1-unit limit: 128% for 2-unit properties, 155% for 3-unit properties, and 192% for 4-unit properties.

In comparison, Connecticut may experience the greatest percentage impact, 8% by loan count and 15% by dollar volume of FHA loans endorsed in calendar year 2010, but would experience loan limit declines ranging from as low as \$1,100 in Windham County to as high as \$133,750 in Fairfield County. Loans originated in Connecticut represented just over one percent of all FHA loans endorsed in calendar year 2010 by both loan count and dollar volume.

When analyzed by potential impact on loan counts, nine states may experience declines that are greater than 5%: Arizona, California, Colorado, Connecticut, District of Columbia, Massachusetts, Maine, New Hampshire, and Oregon. When evaluated by potential impact on dollar volume, eight states may experience declines that are greater than 10%: Arizona, California, Connecticut, District of Columbia, Massachusetts, New Hampshire, Nevada, and Puerto Rico.

IV. Data Tables and Exhibits

The following information follows:

Exhibit 1: Counties Affected by Possible Decrease in FHA Loan Limits for Loans Originated on or After October 1, 2011

Table 1: Potential Decrease in Conforming Loan Limits for Loans Originated on or After October 1, 2011 – Affected Counties Only

Table 2: CY 2010 FHA-endorsed Loans with Balances above HERA Limits

Table 3: CY 2011 to date (Jan-Apr) FHA-endorsed Loans with Balances above HERA Limits

Exhibit 1: Counties Affected by Possible Decrease in FHA Loan Limits for Loans Originated on or After October 1, 2011

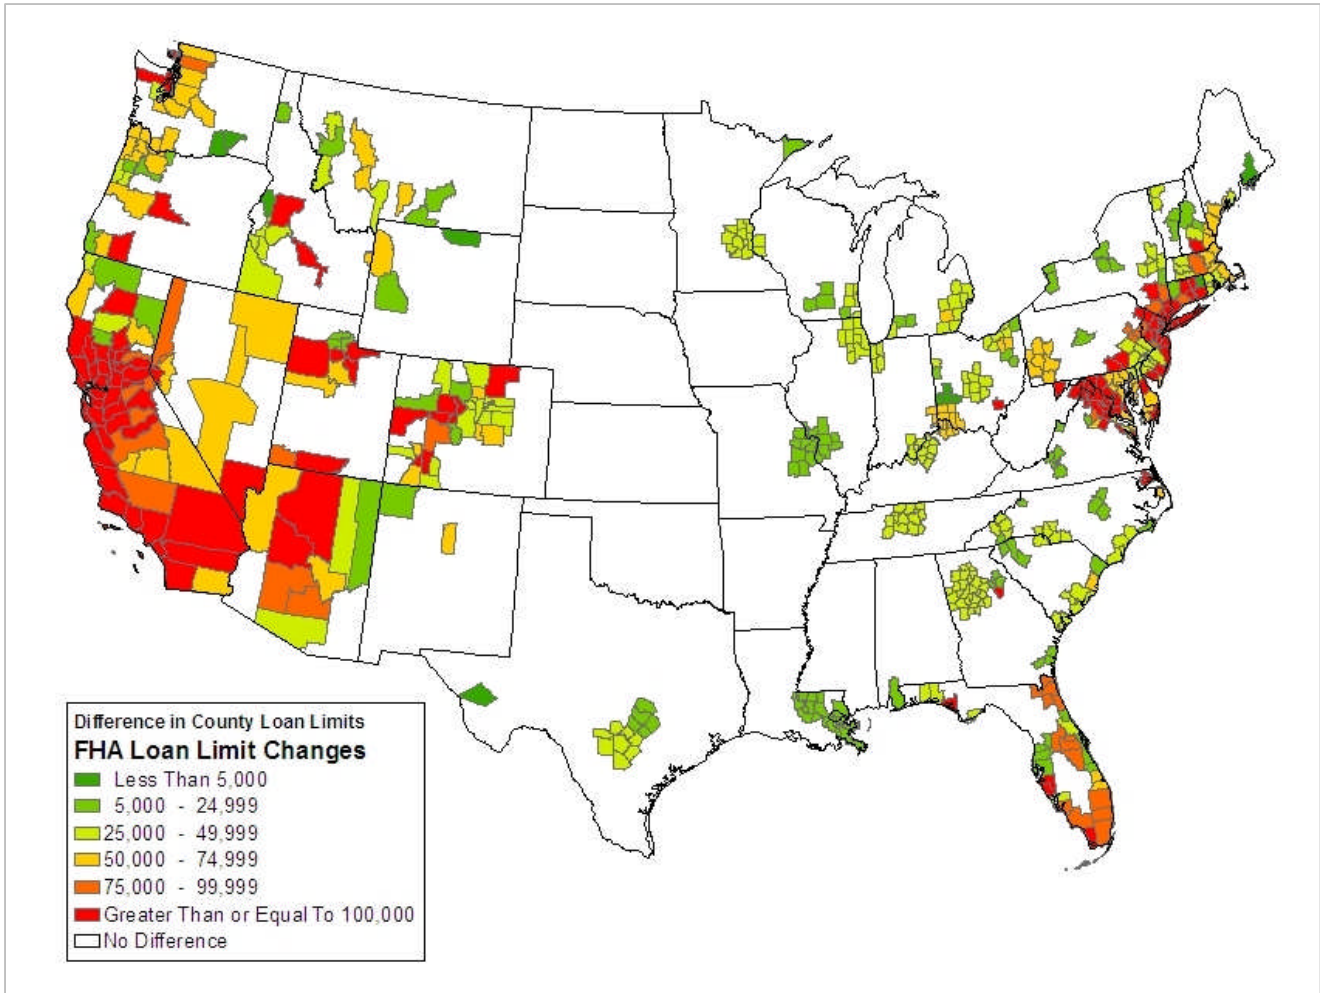

Table 1: Potential Decrease in FHA Loan Limits for Loans Originated on or after October 1, 2011 – Affected Counties Only

(Decrease Would Result from Reversion to HERA Limits from Continuing Appropriations Act of 2011 Limits)
